Every tide of 2027, port by port

Tide and daylight tables for 214 UK ports, printed or as one CSV.

The Tidetable editors

The tables give each port's high and low waters with their heights, and the hours of sunrise and sunset, for every day of the year. High waters are set in ink and low waters in grey, so the day's working window reads at a glance.

A sample page

Day	High	Low	High	Sunset
Thu 1	04:11 4.6	10:23 1.2	16:36 4.6	19:34
Fri 2	05:01 4.8	11:14 1.0	17:26 4.8	19:36
Sat 3	05:52 5.0	12:04 0.8	18:17 5.0	19:38
Sun 4	00:29 0.8	06:42 5.0	12:55 0.8	19:40

Times are local; heights in metres above chart datum. Sample page, not a forecast.

The same tables as one CSV

The file holds one row per port, day and event: `port`, `date`, `event`, `time`, `height_m`. It loads into a spreadsheet, a chart plotter or your own application without conversion.

Lost time is never found again.
